

## MyoSure® Tissue Removal Device

### Prepare Your Office to Perform the MyoSure® Procedure

When establishing office-based MyoSure procedures, you should consult several agencies to help ensure that you adhere to the appropriate regulations and guidelines. These include:

- Local and state regulatory agencies
- Office building management
- Legal counsel
- Confirm processes for reimbursement
- Contracted insurance companies
- Implement training to manage emergencies

#### Required Equipment

To ensure your office is properly equipped to safely and effectively conduct office-based tissue removal, we have provided a list of equipment and supplies that may be necessary to perform a MyoSure procedure in the office. The following is a sample list: it does not include prep tray or sterile pack components, additional optional tools, and required safety equipment. Every physician should use his or her clinical expertise and judgment to decide which supplies are necessary for this procedure. State laws might also mandate particular equipment.

- ✓ MyoSure tissue removal system controller\*
- ✓ MyoSure or Omni® device
- ✓ MyoSure hysteroscope
- ✓ A fluid management system such as the Fluent® or Aquilex® system, or pressure cuff and an IV pole to hang the bag\*
- ✓ ≥1000 mL bag of saline
- ✓ Cysto tubing
- ✓ Buttocks drape
- ✓ Enzymatic cleaner for the scope post procedure
- ✓ Sterile gown
- ✓ Sterile gloves
- ✓ Betadine solution

\*The MyoSure® MANUAL device does not require fluid management capital equipment. Additionally, the MyoSure MANUAL device does not require the MyoSure controller unit.

### Questions to Determine Which Patients Might Be Right for the MyoSure Procedure

- ✓ Does your patient want a procedure that doesn't limit her ability to have children in the future?
- ✓ Does she want relief from her symptoms without the risks of having a major surgical procedure?
- ✓ Is she tired of the hassles of medical treatments like medications?
- ✓ Is she concerned about the long-term use of hormones?
- ✓ Does she think her would life improve if she could lighten or stop her periods altogether?
- ✓ Would she like to learn about a simple, minimally invasive procedure that can get her back to living her life in just a couple of days?

It's important to let your patients know that the MyoSure tissue removal procedure isn't right for everyone and to discuss all the risks and benefits with them.\* It is not appropriate for patients who are or may be pregnant, have a pelvic infection or cervical malignancies, or have been previously diagnosed with endometrial cancer.

\*Please consult the instructions for use for complete indications, contraindications, warnings, and precautions.

#### Important Safety Information

The MyoSure® hysteroscopic tissue removal system is intended for hysteroscopic intrauterine procedures by trained gynecologists to resect and remove tissue including submucous myomas, endometrial polyps, and retained products of conception. It is not appropriate for patients who are or may be pregnant, or are exhibiting pelvic infection, cervical malignancies, or previously diagnosed uterine cancer.
